

## Top hung and pivot window **FPP-V L3**

The top hung and pivot window FPP-V L3 can be opened in two distinct ways:  
outwards from the top or via a centre pivot.

The outward opening function enables the sash to be opened in any position from 0° to 35°, whilst the pivot function allows the sash to be rotated through 180°.

The newly patented fitting system guarantees complete sash stability, both in the top hung and pivot positions.

To add to the window's visual appearance the external profile covering the window is pressed, which improves the attractiveness of the window.

### Features:

- The window as standard is equipped with double glazed energy saving glass unit;
- Manufactured using pinewood, vacuum impregnated and finished with three coats of acrylic lacquer;
- The automatic V40P air inlet guarantees energy savings and ensures water tightness (with opened as well as with closed air inlet) up to 600 Pa. Other windows' air inlets guarantee water tightness (with opened air inlet) up to 250 Pa;
- Operated by handle positioned on the lower part of the sash, opening method can be switched using the preSelect sliding switch in the frame, accessible when the window is open;
- Suitable for roofs with pitches between 15 and 55 degrees (when fitted with correct flashing);
- Wide selection of accessories available;

### Technical Specification

### FPP-V L3 preSelect®

glazing	laminated
low emission coating	+
inert gas filled panes	+
tempered glass	+
air inlet type	V40P
air inlet air flow	23 – 52m³/h
varnishing	two coats
seals	three

### Window dimensions

Model	78x98	78x118
Outside frame mm	777x1180	777x1400
Rough opening mm	817 x 1220	817 x 1440

### Flashing type EL

This allows the windows to be flashed with thin flat roofing materials such as slate or shingles.

### Flashing type EH

This is used where the window is fitted in high-profiled roofing materials such as tiles (up to 90mm profile height) or corrugated metal roof sheeting.

### Make the most of life with FAKRO Accessories
